

COLLEGE AREA

Public Facilities Financing Plan

**October
1993**

(R-94-123)

RESOLUTION NUMBER R- 282802

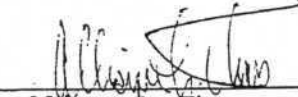

ADOPTED ON OCT 12 1993

A RESOLUTION OF THE COUNCIL OF THE CITY OF
SAN DIEGO, APPROVING THE COLLEGE AREA PUBLIC
FACILITIES FINANCING PLAN.

BE IT RESOLVED, by the Council of The City of San Diego,
that the City Council hereby approves that document entitled
"College Area Public Facilities Financing Plan, June 1993," a
copy of which is on file in the office of the City Clerk as
Document No. RR- 282802.

APPROVED: JOHN W. WITT, City Attorney

By

Allisyn L. Thomas
Deputy City Attorney

(R-94-121)

RESOLUTION NUMBER R- 282803

ADOPTED ON OCT 12 1993

BE IT RESOLVED, by the Council of The City of San Diego,
that existing development impact fees for the College Area
Community are hereby rescinded.

BE IT FURTHER RESOLVED, by the Council, that new development
impact fees for all properties within the College Area Community
as described in the College Area Public Facilities Financing Plan
of June 1993, a copy of which is on file in the office of the
City Clerk as Document No. RR-282802, are hereby
established.

APPROVED: JOHN W. WITT, City Attorney

By

Allisyn L. Thomas
Deputy City Attorney

..... COMMUNITY BOUNDARY

COLLEGE AREA

SUMMARY

This document is the first Public Facilities Financing Plan for the College Area Community Plan area and sets forth the major public facilities needs in the areas of transportation (streets, storm drains, traffic signals etc.), libraries, park and recreation and fire stations. Other public needs such as police facilities, public works yards, landfills, Central Library, etc., concern a broader area than a single community or even multiple communities. Accordingly, they are being analyzed and financing strategies will be developed separately.

The facilities included in this financing plan will be needed over the next approximately twenty years when the ultimate build-out of the community is expected. The College Area Community Plan was adopted in May 1989 and then amended in October 1993 to reflect adoption of the College Community Redevelopment Plan. This Community Plan, is a guide for future development within the community and served to determine the public facility needs reflected in this document. The City Council has previously adopted impact fees to help mitigate the cost of the public facilities necessitated by development in the community. Impact fees for residential and commercial/industrial development were adopted on August 4, 1987, by Resolution #R-269032, and by Resolution R-209274 on September 14, 1987. This document provides the basis for a revision of the impact fees for the College Area Community.

Development Forecast and Analysis

The College Area Community Plan is a comprehensive policy guide for the physical development of the Community. The College Area Community is generally bounded on the north by Interstate 8, on the east by 70th Street and the City of La Mesa, on the south by El Cajon Boulevard, and on the west by Fairmount Avenue and Collwood Boulevard.

An analysis of present and projected development and using the community plan as a guide indicates that, over the next approximate twenty year period, 2300 residential dwelling units will be constructed and an additional 850,000 square feet of commercial/industrial development will take place. Accordingly, it is estimated that combined residential and commercial/industrial development will result in an increase from 200,000 existing trip ends to approximately 238,000 trip ends at Community build-out.

Priority of Facilities as Indicated by the Community

The College Area Community Council (CACC) has given staff a priority listing of facilities included in the financing plan. These recommendations are displayed as submitted in Appendix B. Upon adoption of this plan on October 12, 1993, the City Council directed the Waring Road, I-8 Waring Road Interchange to Canyon Crest Feasibility Study (CA-18) to be Priority #1, the College Heights Branch Library (CA-33) to be Priority #2, and College Avenue: Lindo Paseo to Canyon Crest Drive (CA-1) to be last in

priority. The following list reflects these priorities but has been arranged by project category. Only those facilities included in the Community Plan and not already programmed for construction are listed. Since the following projects are complete or not in the Community Plan, they are not included:

Fairmount Avenue from Montezuma Road to I-8 Widen and
Improvement

Lindo Paseo Storm Drain

Adelphi Place Drain

Austin Drive Drain

Chaparral Way Drain

* West Campus Drive: 54th St to Remington Road Study

The CACC did not include the Mission Valley East Light Rail Transit Extension (CA-A) in its priority listing. This project was added to the plan by the City Council at the time of adoption.

* Not recommended in the Community Plan.

EXISTING PUBLIC FACILITIES & FUTURE NEEDS

Transportation

The College Area is served by a transportation network which consists of automobile and public transportation systems, a bicycle system, and a pedestrian circulation system. Provision of adequate transportation facilities has been a continuing process of providing those facilities. Additional transportation improvements will be necessary to meet both existing needs and the needs of future development.

Transportation improvements in the College Area are dictated by traffic volume. Improvements will be funded through a combination of Development Impact Fees (DIF), Redevelopment Agency funding, TRANSNET, Gas Tax and other funding sources yet to be determined. Additional details on Transportation Improvements are provided in Table 1 and Appendix A.

Fire Protection

Fire protection for College Area is provided by Station #10 located on 62nd Street and Station #17 located on Chamoune Avenue.

There is no anticipated need to build additional fire stations or to enlarge the existing facilities.

Library

The College Area is served by College Heights Branch Library located at 4710 College Avenue, just north of Adams Avenue.

This facility is too small for the community at buildout. A new 10,000 square foot branch library is proposed for the community.

Park and Recreation

The College Area is currently served by a single one-acre park, Montezuma Park. In addition, the recreational facilities of San Diego State University are available for use by the community. A portion of the Hardy Elementary School Site is presently leased and developed with a turfed paying field area. Colina del Sol Community Park and Clay Neighborhood Park, both in the Mid-City Community, provide recreational facilities to the area, but there exists a significant deficiency of park facilities for community residents.

Park and Recreation needs, which are based on General Plan Standards, and are consistent with the community plan, consist of the acquisition and development of one neighborhood park and the turfing of an elementary school playing field. The projects are further described in Table 1 and Appendix A.

SUMMARY OF FACILITIES NEEDS

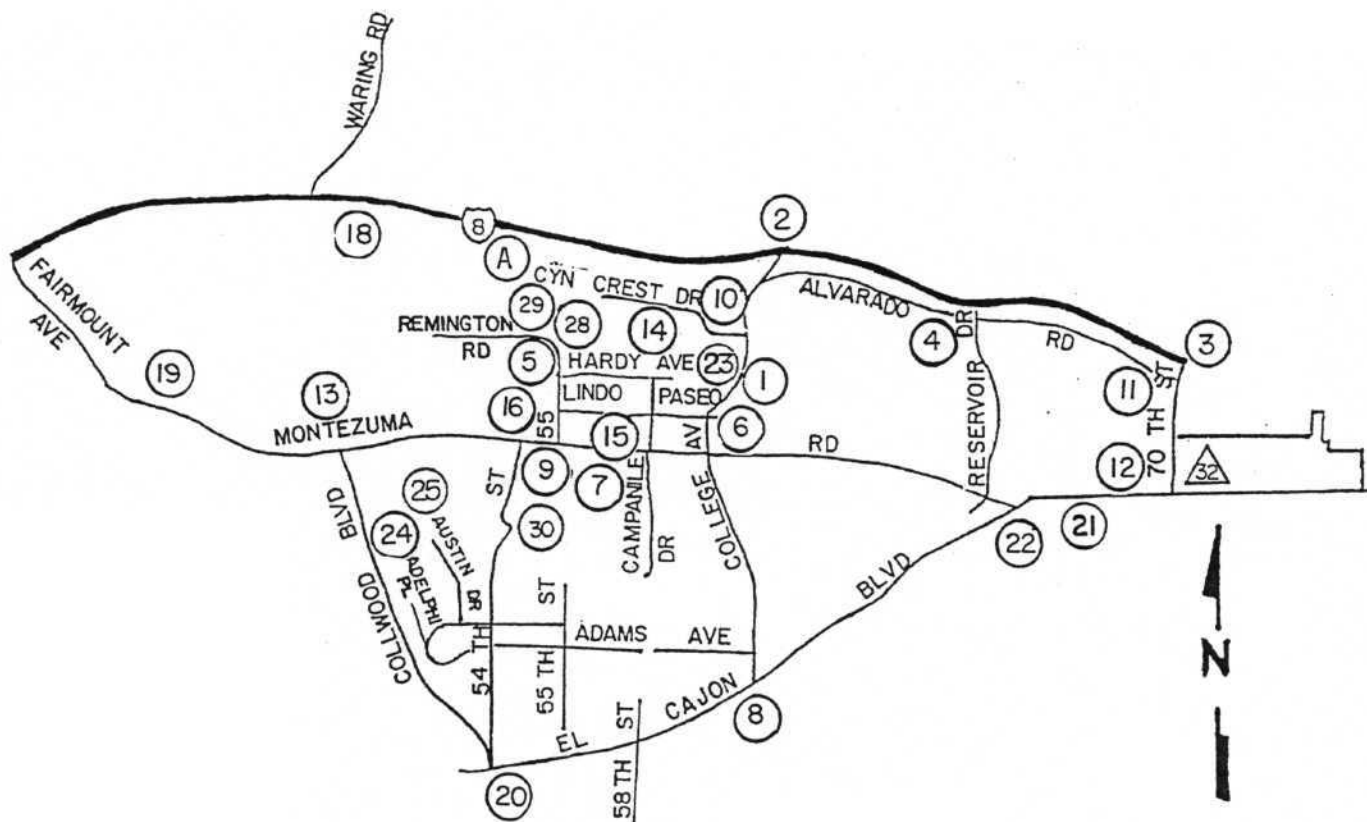

The following figure and tables summarize facilities needs of the College Area Community. Figure 1 illustrates general locations for the projects described. Table 1 reflects both long range needs and those reflected in the current Council adopted Capital Improvements Program (CIP). These projects are more fully described in Appendix A.

The near term needs listed in Table 1 are subject to annual revision in conjunction with Council adoption of the Annual Budget. Depending on priorities and availability of resources, substantial changes from year to year are possible.

In addition to the projects outlined in Table 1 and Appendix A are certain improvements programmed on a City-wide basis which may include projects in the College Area. Utilities Undergrounding (CIP 37-028.0), minor signal requirements (CIP 62-002.0), and bicycle detector loops (CIP 58-079.0) are examples of additional capital improvements more fully detailed in the City's Annual Budget. Water Utilities projects which may be located in the College Area are funded by water and sewer revenues.

COLLEGE AREA - PUBLIC FACILITIES FINANCING PLAN

General

The PROGRESS GUIDE AND GENERAL PLAN (General Plan) for the City of San Diego recommends the division of the City into planning areas which are designed as Urbanized, Planned Urbanizing and future Urbanizing areas. Urbanized areas include the central portion of San Diego as well as the remaining developed/older sections of the City. Planned Urbanizing areas consists of newly developing communities. Future Urbanizing areas include land which is presently undeveloped.

The College Area is an Urbanized area. This document constitutes the first Public Facilities Financing Plan for the College Area Community.

Development Forecast and Analysis

The College Area Community, totalling approximately 1,950 acres, is developing in accordance with the Community Plan to be amended by Council concurrently with this document. Currently, the College Area contains approximately 7,500 dwelling units with a population of approximately 19,000 persons. An analysis of projected development and using the Community Plan as a guide, indicates that over the next twenty years, additional development will take place in the following categories:

<u>Use</u>	<u>Estimated Development</u>
Residential	2300 Dwelling Units
Commercial/Industrial	21,900 Trip Ends

Periodic Revision

To ensure that this program maintains its viability, this plan will be periodically revised to include, but not necessarily be limited to, Council changes to the Capital Improvements Program and the Community Plan.

FINANCING STRATEGY

The City of San Diego has at its disposal a wide variety of potential funding sources for financing public facilities. A portion of the funding for the needed facilities will be provided as a part of the subdivision process by developers and by impact fees. Potential methods for financing public facilities are described below:

1. IMPACT FEES (DIF) - Impact fees are a method whereby the impact of new development upon the infrastructure is measured and a fee system developed and imposed on developers to mitigate the impact. The impact fees are collected at the time of issuance of individual building permits. Funds so collected are deposited in a special interest bearing account which retains all monies for use in the community in which they were collected. As sufficient funds are collected, the City proceeds with a construction program, in order of priority. This is one of the financing methods recommended for the College Area. The City Council has determined that the payment of development impact fees is not required in redevelopment project areas where redevelopment plans provide for the fair share funding of needed facilities by redevelopment.
2. TRANSNET, GAS TAX, and other programs such as a state-local partnership program may provide some funds for community transportation projects. These funds will be allocated annually and may be used to fund a portion of the long-range capital needs for transportation improvements in the College Area in the future.

3. ASSESSMENT DISTRICTS - Special assessment financing, using 1913/1915 Assessment Acts or a Mello-Roos District could be used as a supplementary or alternative method of financing some facilities. The Mello-Roos District requires a 2/3 vote for passage. Other assessment districts require the support of the community.
4. GENERAL OBLIGATION BOND ISSUES - Prior to the late 1960's, bond issues were considered the most appropriate method of funding many types of public facilities. These require 2/3 vote approval for passage.
5. ANNUAL ALLOCATION - In the years prior to the passage of Proposition 13, the City was able to respond to community facility needs by using a portion of the sales tax revenue to support the Capital Improvement Program. This has not been possible for some time. However, if other revenues were increased, annual allocations could again be used to fund some capital facilities. This is a recommended method of funding some park and recreation facilities and transportation improvements.
6. FACILITIES BENEFIT ASSESSMENT (FBA) - This method of financing, used solely in Planned Urbanizing Communities, spreads costs fairly and equally and follows the procedures specified in City Council Ordinance O-15318 dated August 25, 1980. However, this method cannot be used in Urbanized areas such as the College Area.
7. REDEVELOPMENT AGENCY FUNDING - The Redevelopment Agency will employ a variety of financing methods within the Project Area, which may include financial assistance from governmental agencies, tax increment, special assessment districts, sales and transient occupancy tax funds, donations, interest income, Agency bonds,

loans from private financial institutions, the lease of Agency-owned property, and sale of Agency-owned property.

GENERAL ASSUMPTIONS AND CONDITIONS

In connection with the application of the above methods of financing, the following general assumptions and conditions would apply:

1. Developers would be required to provide facilities normally provided within the subdivision process as a condition of subdivision approval, including traffic signals.
2. Abutting property owners are responsible for frontage improvements such as sidewalks, curbs and gutters.
3. The DEVELOPMENT IMPACT FEE would be paid by the developer at the time of building permit issuance.
4. DEVELOPMENT IMPACT FEE funds collected would be placed in a trust account providing interest earnings for the community area.
5. A developer or group of developers can propose to build or improve a specific facility identified in the Capital Improvements Program and, upon City Council approval, enter into an agreement to provide the facility for reimbursement.
6. Within the Redevelopment Project Area, the Redevelopment Agency will negotiate the provision of public facilities in lieu of payment of impact fees.

DEVELOPMENT IMPACT FEE

DETERMINATION

Background

The College Area Community Plan Area is almost fully developed. Thus, the majority of the required public improvements will have to be provided through special funding mechanisms. In late 1987, staff developed and recommended impact fees for 28 urbanized communities. The City Council adopted the recommended fees, including those for the College Area Community Plan Area, to mitigate the impact of development on public facilities. Since the community is near buildout, the fees will provide only a small portion of the financing needed for the facilities.

Outside the Redevelopment Project Area, all undeveloped or underdeveloped parcels are subject to the DIF. Monies collected are placed in City interest accruing accounts, to be used only for capital improvements in the College Area Community.

Distribution of Project Costs and Fee Determination

Development of the actual charge to be imposed by the DIF is based on the extent or degree to which each type of development generates a demand for, or receives benefit from the various public facilities involved. For example, all development generates vehicular traffic and thus, on an equitable basis, should share in

the cost of transportation projects.

Development Impact Fees were determined for the various categories of needed public facilities on the basis of total amount of development at community plan build-out and on the basis of all additional public facilities needed at community plan build-out. The impact fee base includes all project needs aside from those to be funded by the State, a subdivider or by adjacent existing residents. In addition, the fees include a 2% charge to cover City administrative costs.

Transportation

There is a clear relationship between the use of transportation facilities and the generation of traffic trips based upon land use. In the report "San Diego Traffic Generators," authored by CALTRANS and SANDAG, the traffic generated by various classes of use are detailed. This report summarizes data collected at major regional traffic generators as well as neighborhood and local traffic generators in the San Diego area. Traffic counts taken at each facility are related to various characteristics of the facility such as the size, number of employees, floor area, parking spaces, or number of persons. The report distinguishes between the average daily traffic (ADT) generated by a single-family dwelling and a multi-family dwelling. For impact fee purposes, a single type of residential development was assumed for the College Area (and all other urbanized communities). The residential portion of the impact fee reflects use of an average daily traffic factor (ADT) of

7 as a basis for determining the rate.

A considerable range has been found for traffic generation for commercial and industrial developments depending on the character and use of the property. Non-residential land-uses typically generated between 100 to 900 average daily traffic per acre. For non-residential development in the College Area Community, average daily trips were measured. The 1989 College Area Community Plan and the Transportation and Parking Analysis prepared for the College Area Redevelopment Project in 1992 were used in the development of this Financing Plan.

Using the approved land use intensity and trip generation rates, the total number of trip ends at community plan build-out is estimated to be 238,000. An analysis of the City-funded street improvements required at community build-out (costs estimated FY 1994) totaling \$40,877,150 indicates the cost per average daily traffic for transportation facilities is \$175 per trip (and \$1251/dwelling unit) to be paid by all future development. The fee per dwelling unit was calculated using the average daily trip factor of seven, as previously explained.

Fire Facilities

The Fire Station portion of the fee relates to the cost of fire stations providing fire protection services to both residential and non-residential establishments within the community. Residential

impact fees are based on the average cost per dwelling unit.

Since the Fire Department has determined that existing fire facilities are adequate to meet the needs of existing and future development, no additional facilities are needed. Therefore, no fire fee has been calculated.

Libraries

Library needs are based on population which is derived from the number of dwelling units estimated by staff. Therefore, only residential developments are charged a DIF for library facilities.

Based upon General Plan standards and a forecast of total population in the College Area at build-out the existing branch library is adequate to meet community needs. The facility occupies a 4,430 square foot facility and expansion is not possible. Therefore, it is recommended to construct a new 10,000 square foot branch at a new location. Allocating total library requirements only to residential property results in a library impact fee of \$390 per dwelling unit. This was calculated by dividing total library requirements of \$3,750,000 by the residential dwelling units at build-out of 9,800.

Park and Recreation

Park and Recreation needs have traditionally been based on population derived from the number of dwelling units in the community. Council Policy 600-17, adopted in November of 1989, provides for the equitable contribution of funds by both residential and non-residential development to park and recreation facilities. However, since there is insufficient data currently available on which to base the allocation of park and recreation facilities costs to industrial and commercial users in the College Area, these costs are attributed only to residential users. Future revisions of this financing plan may include a different cost distribution.

The Park and Recreation Department has identified projects which will be needed in the College Area Community at build-out. These are shown in Table 1 and Appendix A in detail. Allocating total park and recreation facility costs of \$8,100,000 only to the residential development at build-out of 9,800 units results in an impact fee of \$843 per unit.

FEE SCHEDULE

The resulting impact fees for the College Area are as follows:

RESIDENTIAL PROPERTY					COMM/INDUST	
Trans	Fire	Park	Library	Total	Trans	Fire
				Res.		\$/1000
\$ Per Unit		\$ Per Unit		\$/Unit	\$/Trip	sq. ft.

DESCRIPTION: THIS PROJECT PROVIDES FOR WIDENING OF COLLEGE AVENUE FROM LINDO PASEO TO CANYON CREST DRIVE INTERSECTION TO A MODIFIED SIX LANE MAJOR STREET. THE IMPROVEMENTS INCLUDE RIGHT-OF-WAY ACQUISITION, EXISTING STRUCTURES REMOVAL AND PEDESTRIAN BRIDGE RECONSTRUCTION. IT ALSO INCLUDES CLASS II BIKE LANES. IMPROVEMENTS TO LINDO PASEO AND CANYON CREST DRIVE INTERSECTIONS ARE COVERED IN SEPARATE PROJECTS.

JUSTIFICATION: THIS PROJECT IS REQUIRED TO MITIGATE THE EFFECTS OF GROWTH CAUSED BY REDEVELOPMENT AND TO IMPLEMENT THE COLLEGE COMMUNITY REDEVELOPMENT PLAN.

SCHEDULE: DESIGN AND CONSTRUCTION WILL BE SCHEDULED AS REDEVELOPMENT OCCURS AND FUNDING IS IDENTIFIED.

RELATIONSHIP TO GENERAL AND COMMUNITY PLANS: THIS PROJECT IS CONSISTENT WITH THE COLLEGE AREA COMMUNITY PLAN AND THE CITY'S GENERAL PLAN GUIDELINES.

This is a hand-drawn map of a residential area in San Jose, California. The map shows a network of streets including Manzanillo, Stone, Joan, Countryside, Prosperity, Chaparral Way, Mary Lane, and others. Key landmarks such as the State University Dormitories, Pineda Stadium, and the University of San Jose are marked. House numbers are scattered throughout the map, indicating individual properties. A north arrow is located in the bottom right corner.

Attn: Mr. Gary Hess, Project Manager

Dear Gary,

Enclosed you will find the CACC priority listing of the projects in the College Area - Capitol Needs described in the Public Facilities Financing Plan. Originally, the CACC approved the priorities on July 14, 1993 based on the listing in the Preliminary Draft report, dated May 1993, with an appended four additional projects, which we discussed. The Public Facilities Financing Plan Draft, dated June 1993, was received showing only three additional projects within the list. Our list herein has four modifications to match your latest including the addition of No. 34, West Campus Drive/Remington Road study.

We understand that the light rail trolley may be added. The CACC's position has been to favor the S1 alignment along the south side of I-8. MTDB is still studying new options and is about a year before their recommendation will come forward. CACC would have to know this information to determine its priority. For the time being, you may want to add it to your list.

Sincerely,

Anthony J. Navoy

cc. Judy McCarty/Kristen McDade
